**Subject:** R9 2016 NEPORT Leveraging Summary

Hi Molly,

Attached is a summary of Santa Monica Bay's leveraging data for FY2016 along with a R9-wide breakdown. Thank you for your contributions this year, particularly on thoroughly reviewing projects before approving; it made the process smoother on my end as a result. Please let me know if you have questions or clarifications about the data summary I've provided.

I also want to take this time to get your feedback on how this year's process went for you, if any. I know NEPORT was specially problematic with the switch to a new platform, but we are working to rectify those issues and provide a better experience for all users. Any constructive input, including how I can better function in my role for next year, would be much appreciated.

Thanks again,

Vince
